

Deusto suggestions for ALLVET website

We consider as the website suggested by TUD is a good example.

ALLVET website should be simple, by it we mean the information must be well organized and the menus and submenus must be useful and intuitive. The visitor should find in an easy way all the info and it also must be attractive in terms of design, colours, images...

Based in our experience we can suggest the following structure for the main menu:

PROJECT: description and the following submenu (drop down)

- objectives
- work packages
- results

PARTNERS: short description, role, map

NEWS, EVENTS

CONTACT

RESOURCES: working documents or templates to be used along the project, dissemination materials, etc
